

Praanesh Balakrishnan Nair

Bengaluru, India — +91 9353606438 — praanesh.b.nair@gmail.com
compileartisan.dev — linkedin.com/in/praanesh-nair — github.com/CompileArtisan

Technical Skills

- **Languages:** Python, Java, C++, C, JavaScript
- **Web Technologies:** Astro.js, Django, React, REST APIs
- **Machine Learning & AI:** Deep Learning (CNNs), PyTorch/TensorFlow
- **Development Tools:** Git, GitHub, Linux (Arch), Doom Emacs, Vim, VS Code
- **Technologies & Concepts:** Data Structures & Algorithms, SQL/DBMS, LaTeX, Org-mode, Object-Oriented Programming

Education

- Amrita Vishwa Vidyapeetham, Bengaluru** Aug 2023 - Present
Bachelor of Technology in Computer Science and Engineering with Artificial Intelligence
- Current CGPA: **8.88/10.0**
 - Relevant Coursework: Data Structures, Algorithms, Object-Oriented Programming, Discrete Mathematics
- Sri Chaitanya Techno School, Bangalore** 2021 - 2023
Senior Secondary Education (CBSE Board)
- Score: **83.4%** (417/500)
- Jaigopal Garodia Rashtrottthana Vidya Kendra, Bengaluru** 2014 - 2021
Secondary Education (CBSE Board)
- Score: **94.0%** (470/500)

Projects

- CompileArtisan: Personal Portfolio & Blog** Dec 2024 - Present
- Developed a personal website using **Astro.js**, **React.js**, **JavaScript** and **CSS**; deployed on **Cloudflare Pages**
 - Implemented dynamic routing system for Markdown-powered blog posts with optimized content delivery
 - Showcases technical projects, blog articles, and professional experience with responsive design
- Growth Stage Classification of Corn Grass Weeds** Nov 2025 - Jan 2026
- Developed and fine-tuned a custom architecture combining DenseNet121 + Triplet Attention.
 - Implemented adaptive data augmentation and balanced sampling strategies to address class imbalance, improving model generalization across diverse lighting, angle, and background conditions.
 - Technology Used: Python (Jupyter Notebook), OpenCV, Kaggle.
- Blockchain-Based Communicator with Multicast Transmission** May 2024 - Nov 2024
- Engineered a decentralized peer-to-peer communication system using **Java** with **RSA encryption** and **SHA-256 hashing**
 - Implemented **multicast socket** technology to eliminate centralized servers and enable secure local network communication
 - Designed blockchain architecture for message integrity verification and tamper-proof communication logs

Leadership and Activities

- President, CodeChef ASEB Club, Amrita Vishwa Vidyapeetham** 2025 - Present
- Leading and organizing competitive programming initiatives, contests, and peer learning sessions
- Event Lead, "Write Your Own Programming Language" Workshop, Dastaan Multifest** 2025
Amrita Vishwa Vidyapeetham, National Level Multifest
- Organized and conducted a technical workshop on programming language design and implementation concepts
